Abstract

Growth and Linkages in the Indian Food Processing Sector:

The Indian food-processing sector has witnessed remarkable growth, during the last 9 years ending 2023-24, Food Processing Industries sector has been growing at an Average Annual Growth Rate (AAGR) of around 6.55% as compared to around 6.06% in manufacturing at 2011-12 prices. The sector constituted as much as 7.93% share of FPI in manufacturing sector in 2023-2024. The sector is one of the largest employment providers in the organised manufacturing sector with 12.91% employment in the total registered/organised sector. This highlights its competitiveness and capacity to cater to global markets.

India is the world's largest producer of milk, pulses and jute and ranks as the second largest producer of rice, wheat, sugarcane, groundnut, vegetables, fruit and cotton. It is also one of the leading producers of spices, fish, poultry, livestock and plantation crops. This abundant raw material base offers immense potential for value addition and export. Notably, India reported the processed food exports amounted to USD 10.09 billion in 2024-2025 with significant shares in processed vegetables and fruits, pulses, cereal preparations etc. Further, the sector has attracted 7.21 billion FDI inflow in the last one-decade ending 2024-25. Recognizing the sector's significance, Ministry of Food Processing Industries has extended support and incentives for creation of modern infrastructure with efficient supply chain management, creation of employment opportunities, reducing post-harvest losses, increasing the processing level and enhancing export of the processed foods.

Agricultural Strength and Economic Advantages of Sikkim:

The food processing sector plays a crucial role in establishing strong linkages between the industry and the agriculture sector. Sikkim's agricultural sector significantly contributes to its Gross State Domestic Product (GSDP) of USD 5.87 billion[1]. The state holds the distinction of being the first in the world to practice exclusive organic farming since 2003, with 80% of the rural population engaged in agriculture. The state has dedicated policies for organic farming and a single-window system called Sikkim GO.

Sikkim is recognized as 'Fast Mover'[2] in the North-eastern Region and ranks fifth[3] in the Himalayan State Category in the Export Preparedness Index. Under the Pradhan Mantri Kisan Sampada Yojana, multiple units for the Food Processing sector, including food processing and preservation capacities and food testing labs, have been approved. It holds the position of the second-largest producer and exporter of Black Cardamom (Large Cardamom) in India, along with being the third largest[4] producer of Kiwi in India. The State's key products include tea, orange, barley, millet, maize, and cardamom. The presence of approved incubation centres supports robust innovation and growth in the sector, further enhancing the state's potential for economic development.

1. Overview

Sikkim shares border with Tibet in the north, Bhutan in the east, Nepal in the west, and West Bengal in the south. Situated near India's Siliguri corridor, close to Bangladesh, Sikkim is the least populous and second smallest state in India[5].

It stands out for its rich biodiversity, encompassing alpine, montane, and subtropical climates, as well as being home to Kanchenjunga, India's highest peak and the third highest worldwide. Sikkim is also recognized as the first fully organic state in India and is among the few states that regularly experience snowfall. With its stunning high mountain peaks of the Himalayan range and steep river valleys, Sikkim exhibits a diverse range of geographical features[6].

Table 1: Sikkim overview

Particulars	**Details**
State Capital	Gangtok
Geographic Area[7]	7096 sq. km
Population (Census 2011)[8]	610.58 million
Total Road Length (2020)[9]	12,296 km
Gross State Domestic Product (GSDP)[10] 2023-24	USD 5.87 billion
Airport	Pakyong Airport
Infrastructure[11]	1 Air Cargo Terminals 2100 MT Cold Storage Capacity

2. Advantage Sikkim

- 2nd largest producer and exporter of Black Cardamom (Large Cardamom) in India.[14]
- 3rd largest producer of Kiwi in India[15].
- First State in the world to practice Organic Farming exclusively, and the first State in India to officially adopt organic farming for over 2 decades (since 2003)
- Graded as Fast Mover in North- eastern Region, as per LEADS 2024[16].
- Ranked 5th under the Himalayan States Category in NITI Aayog's Export Preparedness Index[17].
- High hydropower generation capacity, with an estimated potential of 8000 MW[18].

3. Local Food System

3.1 Indigenous Produce

The State's most effective agricultural approach is sustainable farming practices, which provides economic viability for individual farmers while also being environmentally friendly. As a State renowned for organic production, the government is actively promoting and encouraging farmers to embrace modern technology and practices of organic farming to ensure consistent production and certification processes[19].

Sikkim has diverse climates, ranging from humid tropical to temperate and alpine regions. Most of the State's population is employed in agriculture-related activities. With over 80%[20] of the rural population relying on agriculture and allied sectors, it forms the dominant occupation. The abundant irrigation from the Teesta and Rangeet rivers, along with their numerous tributaries, ensures year-round fertility of the land.

The agricultural products are tomato, rice, maize, tea, soybeans, ginger, citrus, pears, and; buckwheat among cereals; black gram (urad) and rice bean among pulses; soybean and mustard among oilseeds, and ginger. Orange and pears are the important fruit crops, and large cardamom, turmeric, cherry pepper, and potatoes are the most important herbs and vegetable crops.

Sikkim has favorable agro-climatic conditions with five agro-climatic zones[21] encouraging the cultivation of a multitude of crops, vegetables, and fruits around the year.

State has received 2 Geographical Indication (GI) Tags For[22] –

- Sikkim Large Cardamom
- Dalle Khursani (chilly)

3.2 Key Production Statistics

5. Agricultural Marketing

The following organizations take up agriculture marketing in the State:

NERAMAC's primary objective is to enhance agricultural prosperity in the Northeastern States, including Sikkim, by ensuring fair prices for farmers' produce and reducing the involvement of intermediaries and middlemen in the market.

SIMFED, established as the apex marketing society for Sikkim, focuses on wholesaling consumer goods to Multi-Purpose Cooperative Societies (MPCS) and Consumer Cooperative Societies (CCS). Additionally, it facilitates the bulk marketing of surplus agricultural produce, including valuable cash crops from the State[29].

Table 8: Agricultural Markets in Sikkim

6. Potential Opportunities

Sikkim offers several food processing opportunities due to its rich agricultural resources and focus on organic farming. Here are some potential food processing sectors for Sikkim:

6.1 Spices and Bakery

The State is one of the largest producers and exporters of large cardamom. Diverse climatic conditions from tropical moist to temperate and alpine zones are the main requirement to produce Queen of Spices 'Cardamom'.

Cardamom is used for flavouring various food, confectionery, beverages, and liquors preparations. Also, the State is involved in the processing of flour, tea, fruits, bakery goods, and other food products, which take place in several large processing facilities in the State. The State also presents high potential for higher level processing of cardamoms to extract nutraceuticals, pigments, oleoresins etc.

- **Cardamom-spiced cookies:** Add a twist to traditional cookie recipes by incorporating ground cardamom into the dough. The warm and fragrant spice will give the cookies a delightful flavour.

- **Cardamom-infused syrup:** Create a cardamom-flavoured syrup that can be drizzled over pancakes, wafles, or desserts. The syrup can be made by simmering cardamom pods or ground cardamom with sugar and water, resulting in a sweet and aromatic topping.

- Produce healthy and organic snacks, bakery items, and cookies using locally sourced ingredients like millet, buckwheat, and traditional grains.

6.2 Fruits & Vegetables

- **Organic food products:** Process and package organic fruits, vegetables, grains, and spices, leveraging Sikkim's status as India's first organic State.

- **Fruit-based products:** Process local fruits like oranges, apples, kiwis, and strawberries into jams, jellies, fruit preserves, and dried fruit snacks.

- **Vegetables** like okra, beans, potato and peas are produced which can be processed to food items like Pickled Okra, Pea Puree, (for sauces/soups), beans paste, canned beans, French fries, and Potato starch.

6.3 Ready-to-Eat

Sikkimese cuisine products:
Create ready-to-eat Sikkimese food products like:

- Momos
- Kinerma (Fermented soybean product)
- Gundruk (Fermented leafy green vegetable preparation as an accompaniment to rice or ingredient in soups and stews)
- Saelroti (Deep fried rice flour bread)
- Condiments, and sauces that showcase the unique flavours and culinary traditions of the region.

6.4 Infrastructure and Innovative Technology

Investing in food processing infrastructure in Sikkim can boost the State's economy, create employment opportunities, enhance agricultural value chains, and promote sustainable and high-value food products from the region.

Development of food parks: Establish dedicated food processing parks or industrial clusters that provide infrastructure facilities such as processing units, cold storage, packaging facilities, and quality control labs. These parks can attract food processing companies and promote collaboration among industry players.

Cold storage and warehousing facilities: Develop modern cold storage and warehousing facilities to preserve and store agricultural produce, ensuring their freshness and quality.

Packaging Units: equipped with advanced machinery for efficient and hygienic packaging of processed food products. These units can cater to the packaging needs of various food processing companies, ensuring attractive and shelf-stable packaging solutions.

Infrastructure for value addition: Develop infrastructure facilities for value-addition processes such as dehydration, canning, juicing, and milling. These facilities can enhance the shelf life and marketability of agricultural produce and encourage farmers to diversify their offerings.

7. State Government Initiatives and Schemes

State Government has undertaken several reforms to offer an enabling and investor-friendly business climate for investors keen on setting up business in the State. Some of the key EoDB initiatives by the State are as follows:

7.1 Sikkim GO

An identity and access management platform based on single sign-on that allows users to securely log in with numerous State-delivered applications and websites by logging in just once with just one set of credentials. Citizens of Sikkim can access all the services on a single platform. **(**sso.sikkim.gov.in)

7.2 Central Industrial Land Bank Portal

Industrial parks serving as a one-stop repository of all infrastructure-related information such as connectivity, infra, natural resources and terrain, plot-level information on vacant plots, and contact details. **(**iis.ncog.gov.in)

7.3 Sikkim Policy on Organic Farming 2010[33]

To minimize the usage of agrochemicals and other dangerous substances in different agro-based plants and expand the State's preserved traditional agricultural knowledge.

7.4 Prime Minister's Development Initiative for North-East Region[34]

Aims to accelerate and comprehensively develop the North-East Region by funding infrastructure and social development projects according to the State's identified needs. It seeks to address gaps in different sectors without replacing existing Central and State Schemes.

Sikkim provides investors with assistance for capital investment and technology upgradation, a strong marketing network, rich and diversified human capital, quality assurance, and grants. Some of the important initiatives taken by the states to promote the food processing sector are:

1. Annual Buyer Seller Meet
2. Annual Food Summit
3. Trade Fair & Exhibitions – National & International
4. Training & Development Programme
5. Marketing and Branding Support
6. Financial Assistance through subsidized loans and grants

Some of the upcoming projects to support the food processing sector are as follows:

1. Food Testing Laboratory in all Districts
2. Warehousing Facility
3. Tie up with Open Network for Digital Commerce (ONDC) for digital platform
4. Cold Chain Storage
5. Packaging House

7.5 MOVCD-NER (Mission Organic Value Chain Development for North Eastern Region)

It's a Central Sector Scheme launched by the Ministry of Agriculture and Farmer Welfare to promote and support organic farming in the North Eastern states of India. This scheme is part of the broader Paramparagat Krishi Vikas Yojana (PKVY) and focuses on creating a sustainable organic value chain from production to marketing.
